  - Transit Installations and Transit Plan Updates
    - Strategies
    - Evaluation Methodology
    - Modeling Updates
    - Next Steps
- Break-Out
Transit-Related Projects – Completed

- Bus Stop and Private Shuttle Pick-Up moved along Summer St @ Atlantic Avenue
- New Bus Lane on Summer Street
- Silver Line Ramp for direct outbound connection to Ted Williams Tunnel
- Fan Pier / Lovejoy Water Ferry
- D Street Silver Line Signal Improvements
- Intelligent Transportation Systems Improvements
- Improved Signalization on Atlantic Ave
- City Point Bus Terminal
- South Boston Waterfront Transportation Center
Transit-Related Projects – Completed

- Consolidated Shuttle Bus Program
- Added 19 new peak hour trips on the MBTA Route 7 and 9
- Silver Line Bus Fleet Overhaul
- Seaport Blvd. Reconstruction
- Summer Street Phase 1
- Improved Pedestrian Experience by adding Wayfinding Signs
Transit-Related Projects – In Progress

• Silver Line Capacity Study
• Advancing Summer Street Bus Lane
• Seaport Circulator
• Next Generation Silver Line Bus Vehicle Testing
• Red Line Vehicle Procurement
• MBTA Better Bus Project
• Improvements to MBTA Route 7 Bus service approaching South Station and Dewey Square
• Increasing frequency of off-peak service for MBTA Routes 7 and 9 Buses
Transit-Related Projects – In Progress

- Northern Avenue Bridge Design
- Summer Street Phase 2 Planning
- Designing Adaptive Traffic Signal Network
- BRT Lane on Albany Street, connecting Dudley Square to Broadway Station
- Courthouse Station Access
- South Station Expansion
Bus Network Redesign

- The Bus Network Redesign is a complete re-imagining of the MBTA’s bus network to reflect the travel needs of the region
- Using location based data to redesign the bus system
- New network implemented beginning in mid-2022
In September, the first wave of changes included:

- More service to Routes 7 and 9
- Routes 448, 449, and 459 canceled
- New stops for Route 4 on Seaport Blvd. (no longer serves Courthouse on Northern Avenue)

The next round of changes is coming **December 22, 2019**

- Updated travel times for SL1, SL2, and SL3 = improved reliability
- More vehicles = improved frequency
- All SL2 service operates in clockwise direction around Design Center = Simplified SL2 schedule

**Better Bus Project**

**Massachusetts Bay Transportation Authority**
As a recommendation of the SBWSTP, the MCCA began working with local businesses to consolidate the employee shuttle programs from North Station to the South Boston Seaport to reduce the number of shuttles and increase the frequency.

In 2018, one of the consolidated shuttle routes was converted to a ferry.

- 6 buses became 2 ferries and is open to the public
- The ferry moves ~ 650 people a daily and ~14,000 people monthly
- 92% are corporate riders and 8% are members of the public
Seaport TMA has submitted a grant application to MassDOT to fund 80% of the 3-year start up cost of a new public transit service to serve the South Boston Seaport.

A multi-vehicle circulator system that would connect and supplement the South Boston Seaport’s most vital transit hubs (South Station, Silver Line, Fan Pier Ferry Terminal) with the South Boston Seaport’s largest employment, retail, and residential destinations.

Service will be open to the public.

Operating 3, 26-passenger ADA accessible buses from 7am-7pm with 10-15 minute headways.

Awaiting Decision from MassDOT
Agenda

- Open House
- Presentation
  - Transit Installations and Transit Plan Updates
  - Strategies
  - Evaluation Methodology
  - Modeling Updates
  - Next Steps
- Break-Out
& public feedback for this project, including that heard at the June and October public meetings
Examples of Strategy Funding Sources

- Capital Improvement Funds
- Grants
- Operating Funds – City of Boston, other agencies (MassDOT, MBTA, MassPort)
- Federal Transit Administration Grants / Funds
- Development Impact Fees
- Private Funding – Seaport TMA, Boston Harbor Now
Strategies for Evaluation

Each strategy has a sheet that will be used to describe the strategy and act as a rubric after evaluation is completed later in the Plan.

Strategies fall in one of five categories:

- New Connections
- Improved Transit Service
- Transit Infrastructure
- Access to Transit
- Policy and Information

**Score card for evaluation**

**Image of strategy**

**Strategy: Summer Street Bus Lanes**

**What It Does:**
- EXPAND
- RELY
- RESPECT
- EQUALIZE

**What It Takes:**
- $\$: Low
- $$$$: Medium
- $$$$$$: High
- Time:
  - Short Term
  - Mid-term
  - Long Term

**What It Is:**
- Center median, protected bus lanes on Summer Street from Downtown to Reserve Channel with stops at South Station, Melcher St., BCEC, and Raymond L. Flynn Marine Industrial Park.

**Strategy ID – TI represents Transit Infrastructure**
**Strategy: Urban Rail Connections**

**What It Does:**
- EXPAND
- RELY
- RESPECT
- EQUALIZE

**To be completed during evaluation process**

**What It Takes:**
- Low
- Medium
- High
- Short Term
- Mid-term
- Long Term

**Strategy ID: NC-07**

**What It Is:**
- Urban rail connection on Track 61 to connect existing stations and Fairmount rail line to the South Boston Seaport
- Urban rail connection on Track 61 to connect Back Bay Station to South Boston Seaport
- Urban rail connection from JFK / UMass Station to South Boston Seaport

**DRAFT - CONCEPT ONLY**
Strategy: Extend Regional Transit Express Services

What It Is:
- Extension of regional transit authority express bus routes to South Boston Seaport

What It Does:
- EXPAND
- RELY
- RESPECT
- EQUALIZE

What It Takes:
- Low
- Medium
- High
- Short Term
- Mid-term
- Long Term

To be completed during evaluation process

DRAFT - CONCEPT ONLY

Strategy ID: NC-13
**Strategy: Improve Silver Line Service**

**What It Does:**
- EXPAND
- RELY
- RESPECT
- EQUALIZE

**What It Takes:**
- Low
- Medium
- High

**What It Is:**
- Rehabilitation / replacement of bus / Silver Line fleet
- New buses and Silver Line vehicles
- Automatic door openers at all Silver Line Stations

**To be completed during evaluation process**

Strategy is a part of the universe of options being analyzed – at this point, no recommendations have been made.
**What It Is:**

- Center median, protected bus lanes on Summer Street from Downtown to Reserve Channel with stops at South Station, Melcher St., BCEC, and Raymond L. Flynn Marine Industrial Park

**Strategy:** Summer Street Bus Lanes

**What It Does:**

- EXPAND
- RELY
- RESPECT
- EQUALIZE

**What It Takes:**

- Low
- Medium
- High

DRAFT - CONCEPT ONLY

Strategy ID: TI-05

Strategy is a part of the universe of options being analyzed – at this point, no recommendations have been made.
Strategy: Improve Ferry Terminals and Connections

What It Does:
- EXPAND
- RELY
- RESPECT
- EQUALIZE

What It Takes:
- Low
- Medium
- High
- Short Term
- Mid-term
- Long Term

What It Is:
- Expansion of ferry terminals on both sides of WTC
- Layover berthing opportunities along Northern Avenue, World Trade Center, Fish Pier, Wharf 8
- Improved connections to ferry stops for pedestrians, bikes, and bus / shuttles, and mobility hubs

Strategy ID: BA-03

DRAFT - CONCEPT ONLY

To be completed during evaluation process
Strategy: Wayfinding

What It Does:
- EXPAND
- RELY
- RESPECT
- EQUALIZE

To be completed during evaluation process

What It Takes:
- Low
- Medium
- High

Short Term
Mid-term
Long Term

What It Is:
- Implementation and expansion of traveler information system
- Branding transit in the South Boston Seaport
- More wayfinding signage to Silver Line and other transit stops
- Service countdown clocks and public art at bus stops
- Expansion of transit information to off-peak commuters and non-commute trip users

DRAFT - CONCEPT ONLY

Strategy is a part of the universe of options being analyzed – at this point, no recommendations have been made.
Agenda

• Open House

• Presentation
  • Transit Installations and Transit Plan Updates
  • Strategies
  • Evaluation Methodology
  • Modeling Updates
  • Next Steps

• Break-Out
Goals

**EXPAND**
Access to the region’s people and places is maximized

**RELY**
Transit is a reliable, predictable option for travel

**RESPECT**
Transit access is convenient and integrated into all aspects of the South Boston Seaport

**EQUALIZE**
Transit serves all people and places in the South Boston Seaport
Goals and Objectives

EXPAND – Access to the region’s people and places is maximized

- Increase in the number of people / jobs accessible by transit in 30 / 45 / 60 minutes
- Improve competitiveness to major transit facilities downtown and others as determined
- Add connections to currently un- or under-served areas
- Ability of Service to be implemented quickly
Evaluation Methodology

EXPAND – Access to the region’s people and places is maximized

Ability of Service to be implemented quickly

Points awarded (1-5) based on the cost of the project and project timeline with higher points being awarded to projects that can be implemented quickly and for low budget.
Evaluation Methodology

EXPAND – Access to the region’s people and places is maximized

Improve competitiveness to major transit facilities downtown and others as determined

Points awarded (additively) for direct connections to transit facilities around the area, in order of proximity and service to South Boston Seaport

- 3 points for service to critical downtown transit hubs
- 2 points for service to inner subway stops and regional transit centers
- 1 point for service to any other MBTA stop or Park and Ride lots
Strategy: Ferry from North Station to Fan Pier

What It Does:

EXPAND
RELY
RESPECT
EQUALIZE

What It Takes:

Low  Medium  High

Short  Mid-term  Long  Term

What It Is:

- Private ferry service from Lovejoy Wharf at North Station to Fan Pier in the South Boston Seaport
- Ferry is available to select business community members in the South Boston Seaport for free, and the public if space available for a fee

To be completed during evaluation process

DRAFT – EXAMPLE ONLY

Strategy ID: NC-00
Sample Evaluation

EXPAND – Access to the region’s people and places is maximized

Improve competitiveness to major transit facilities downtown and others as determined

Lovejoy / Fan Pier Ferry = 3 points

Connection to North Station
Goals and Objectives

RELY – Transit is a reliable, predictable option for travel

- Destinations (regional coverage) with a reduction in number of excessive transfer
- Percent of travel on dedicated facilities or with improved priority
- Overall level of improvement on key congested travel paths (all modes), including the impact of transit on other modes
Evaluation Methodology

RELY – Transit is a reliable, predictable option for travel

Destinations (regional coverage) with a reduction in number of excessive transfer

Points awarded for a reduction in number of transfers

- 1 point for each transfer eliminated
- 0 points for no change in transfer count
- -1 points for any additional transfer required
Sample Evaluation

RELY – Transit is a reliable, predictable option for travel

Destinations (regional coverage) with a reduction in number of excessive transfer

Lovejoy / Fan Pier Ferry = 2 points
Ferry is a direct service, replacing MBTA rapid transit, requiring transfer @ Downtown Crossing and South Station

+ 1 point
+ 1 point
Goals and Objectives

RESPECT – Transit access is convenient and integrated into all aspects of the South Boston Seaport

- Integrated and improved neighborhood access for better true walk coverage
- Level of enhancement to quality of transit stations / amenities
- Service / route level improvements in passenger experiences
Evaluation Methodology

RESPECT – Transit access is convenient and integrated into all aspects of the South Boston Seaport

Level of enhancement to quality of transit stations / amenities

Points distributed for class of station improvements and amenities added

- 0 points for no change
- 1 point for basic amenities
- 2 point for good amenities
- 3 points for great amenities
Evaluation Methodology

RESPECT – Transit access is convenient and integrated into all aspects of the South Boston Seaport

Level of enhancement to quality of transit stations / amenities

Lovejoy / Fan Pier Ferry = 6 points
Ferry is a brand-new service
Goals and Objectives

EQUALIZE – Transit serves all people and places in the South Boston Seaport

- Transit is competitive in access, time, and price to vehicle travel
- Provides service coverage throughout the South Boston Seaport
- Provides consistency of service between peak and off-peak times
Evaluation Methodology

EQUALIZE – Transit serves all people and places in the South Boston Seaport

Provides consistency of service between peak and off-peak times

Points awarded if transit schedules are consistent across all hours of the day

Double points if transit service operates between 3 and 6 am and / or 9 pm and 12 am
Evaluation Methodology

EQUALIZE – Transit serves all people and places in the South Boston Seaport

Provides consistency of service between peak and off-peak times

Lovejoy / Fan Pier Ferry = 0 points

Peak hour service only

  • Next Steps

• Break-Out
How Do / Will People Travel to, from, and around the South Boston Seaport?

MOBILE

BUS RIDERS

MODEL

CENSUS

SOUTH BOSTON SEAPORT
Anonymous data from location-based service (LBS) from smartphone apps – users have enabled location-based services

Movements between locations are **trips**

Trip purpose, time period, and report area

MassDOT shared summary data from the Bus Network Redesign effort
Updating the Baseline

Adjust 2018 and 2040 trip tables from CTPS

- Update trip totals based on Silver Line Capacity Study analysis
- Scale LBS and CTPS trip tables to updated trip totals for commute, other work, and other trips

Recalibrate CTPS mode choice model with 2018 Seaport mode shares

Run model with updated assumptions
2018 Trips to the South Boston Seaport

More Trips Within the South Boston Seaport

Over 1,000 daily trips from most of the City of Boston

More Trips from Cambridge and Somerville
2040 Trips to the South Boston Seaport

More Trips from Everywhere
What Will We Get from the Analysis?

- Transit Competitiveness
- Accessibility by Mode
- Travel Time by Mode
- Travel Demand by Mode
- Transit Capacity Needs
The model is now calibrated

- Trip production and distribution from the LBS data
- Future growth potential of the South Boston Seaport

It highlights gaps/new strategic questions to solve

- Why are people not traveling from Boston neighborhoods to the South Boston Seaport? How can we support them?
- Why is it that so many people take transit from north of the City, even when it is not great?
Agenda

• Open House

• Presentation
  • Transit Installations and Transit Plan Updates
  • Strategies
  • Evaluation Methodology
  • Modeling Updates
  Next Steps

• Break-Out
Next Steps

- Strategies and metrics open for comment until **December 31, 2019**
- Evaluation begins **January 1, 2019**
- Next meeting will report out initial evaluation
