Planning & Community Studies
PLAN: Downtown Vision Statement

Develop a new framework for the preservation, enhancement, and growth of Downtown Boston as a place for all, balancing livability, daylight, walkability, climate change preparedness, access to open space, affordability, and a dynamic mix of uses.
PLAN: Downtown will...

1. Preserve cultural heritage and embrace distinctive histories to create a unique and cohesive Downtown.

2. Promote dense, mixed-use development to support living, working, and leisure activities in an 18 hour/day, 7 day/week district.

3. Encourage economic development that maintains Downtown as a diverse, equitable, regional job center.

4. Promote the retention, growth, and diversity of active ground-floor uses, especially legacy and small businesses.

5. Enhance access to housing for Boston residents across all levels of affordability, stages of life, and backgrounds.

6. Improve connections through, within, and to Downtown, with a focus on active transportation, transit, and other non-vehicular modes of transportation.

7. Encourage consistent, safe, healthy, and high-quality improvements to the public realm that welcome everyone year-round.

8. Preserve historic building fabric and cultural institutions while advancing climate preparedness and resiliency measures.

9. Ensure future development and public realm projects are resilient, and mitigate climate change impacts related to sea level rise, coastal storms, increased stormwater, and rising temperatures.

10. Reduce the carbon impacts of new and existing buildings, transportation, and waste and consumption in Downtown.
PLAN: Downtown Identified Public Benefits

Affordable Housing  Climate + Resilience  Local Transit + Mobility

Small Business Support + Retail Activation  Historic Preservation  Open Space & Public Realm

SECTION 204: Sub-Area Design Objectives

The design objectives of the South Cove Urban Renewal Area can be described in terms of five major sections of the Project.

1. Tyler-Hudson Street Residential Community (Parcels R-1, R-2, R-2a, R-3, R-3a, P-1)

   The primary objective in this area is to preserve the present character of the area by retaining as much as possible of the existing housing and local street patterns. All new housing should be compatible with the existing structures and building layout. The non-residential characteristics of the Massachusetts Turnpike and railroad cut, as well as the Turnpike retaining wall along Hudson Street, should also be mitigated.

   High-rise construction is acceptable as long as existing high-rise buildings are not overshadowed. Because of the small size of this residential community, and because it is and will be closed in by the Turnpike, it is important that all pedestrian walkways and building layouts give a sense of connection to the residential areas to the west.

   In order to preserve the specific character of this community and provide shopping convenience to its residents, stores related to the neighborhood are acceptable and even encouraged on the first floor of residential structures in some locations. For the same reasons, community facilities related to the neighborhood are acceptable in most locations.
