Trends in Article 80 Development

Research Division
The BPDA Research Division strives to understand the current environment of the city to produce quality research and targeted information that will inform and benefit the residents and businesses of Boston. The Division conducts research on Boston's economy, population, and commercial markets for all departments of the BPDA, the City of Boston, and related organizations. The information provided in this report is the best available at the time of publication.

All or partial use of this report must be cited. Our preferred citation is as follows:
Boston Planning & Development Agency Research Division, January 2019

More research produced by the Boston Planning & Development Agency can be found on the BPDA Research Website: Research Publications

Research requests can be made through the BPDA Research Division's Research Inquiries.
The BPDA Research Division maintains a dataset of projects approved through Article 80B Large Project Review, 80E Small Project Review, 80A Notice of Project Change, 80C Planned Development Area Review, or 80D Institutional Master Plan Review (see Glossary). Details including square footage, residential units, and development cost are recorded at initial approval and again if a project receives an NPC approval. Permit and certificate of occupancy data come from the Inspectional Services Department and allow the Research Division to track project lifecycle from approval through construction and completion.

This Report analyzes development trends in five sub-markets (housing, office, hotel, industrial, and institutional) while describing concurrent economic and demographic trends that may influence development. Together, these data depict the recent cycle of real estate development in Boston, from the beginning of Article 80 in 1996 through the development downturn during the 2008-2009 recession to the recent development boom coinciding with the city’s economic recovery.
Glossary

- **Article 80**: Adopted in 1996 by the BPDA to provide clear guidelines for the development review process, including but not limited to review of a project's impacts on transportation, public realm, the environment, and historic resources. Public input is encouraged throughout a project's review timeline.

- **Institutional Master Plan**: Planning and zoning document required by Article 80-D for all colleges, universities, and hospitals with over 150,000 square feet of tax-exempt real estate. IMPs are generally renewed every ten years.

- **Large Project**: Required for all projects that involve the addition of an aggregate gross floor area of more than 50,000 square feet.

- **Notice of Project Change (NPC)**: A document which may be filed by a project proponent with the BPDA if the project scope undergoes changes that are substantial enough to call for additional review and approval.

- **Small Project**: Required for projects that involve the addition of an aggregate gross floor area of between 20,000 and 50,000 square feet and/or any project that results in the creation of 15 or more dwelling units.

- **Planned Development Area**: An overlay zoning district which may be established under Article 80 where a development that is well-suited to its location cannot be accommodated by the general zoning for the area. For example, a development that involves a large building, a cluster of buildings, or a mix of uses.

- **3-Year Rule**: If a project is approved and then returns to the BPDA for an NPC within three years, the net change in square footage, development cost, and units is recorded. If the NPC returns to the BPDA more than three years since the project was originally approved, the gross square footage, development cost, and units are recorded.

- Boston Planning & Development Agency
Boston’s recovery from the recession has been strong

Boston’s total annual economic activity has increased by $29 billion since 2002 and has grown at an average rate of 2.6% per year since 2009. Average annual unemployment hit a low of 3.7% in 2017, with Boston’s rate remaining below Massachusetts’.

Source: U.S. Bureau of Economic Analysis; Massachusetts Executive Office of Labor and Workforce Development (EOLWD), BPDA Research Division Analysis.
120,000 new jobs in Boston since the end of the recession

The number of payroll and non-payroll jobs increased 24% to 794,000 in 2016, from a recent low of 639,000 in 2004.

Source: U.S. Bureau of Economic Analysis; Massachusetts Executive Office of Labor and Workforce Development (EOLWD), Employment and Wage (ES-202), BPDA Research Analysis.
2. Overall Development Trends
Low interest rates have made borrowing attractive

Rates have stayed below 4% since 2009 and have only recently begun to rise from a low of 1.6% in 2016.

Source: US Department of Treasury; Federal Reserve Bank of St. Louis, BPDA Research Division Analysis.
The cost of construction inputs has risen

Since 1996, the price index for inputs to new construction has increased 64%, with brief dips in 2009 and 2015-2016.

Construction commodity prices have fluctuated

Source BPDA Pipeline Database (current as of October 1st, 2018), BPDA Research Division Analysis. Gross square footage of most recent approval taken. Downtown includes Chinatown, Leather District, West End, North End, and Beacon Hill. South End includes Bay Village. Square footage updated to reflect data improvement, January 2019.
There has been a modest uptick in average size of approved projects.

Average Square Footage for First-Time Approvals by Year of Approval

Source: BPDA Pipeline Database (current as of October 1st, 2018), BPDA Research Division Analysis. Project square footage based upon original approval date, excluding NPCs.
Around 22% of square footage approved since 1996 has returned to the Board for an NPC.

Projects approved leading up to or during a recession tended to return to the Board for changes in the future.

46% of square footage approved in 2001 and 48% of square footage approved in 2007 returned to the Board in subsequent years.

Source: BPDA Pipeline Database (current as of October 1st, 2018), BPDA Research Division Analysis.
Square foot totals take net square footage except for projects outside of the 3-Year rule, where the square footage is counted twice.
The average project timeline from approval to completion is around 3 years

Project Timelines for Small and Large Projects Approved 2006 - 2014

Average Time to Major Project Milestones by Year of Approval

Source: BPDA Pipeline Database (current as of October 1st, 2018), BPDA Research Division Analysis. Time to permitting calculated by taking the average days between original approval and first construction permit for all projects with a permit. Time under construction calculated by taking the average days between construction permit and certificate of occupancy for all projects with both. Time to completion calculated by taking the average days between original approval and certificate of occupancy for all projects with a COO. For projects that have received an NPC, timelines calculated from original approval date. Charts updated January, 2019 to reflect data improvement.
A wave of completions is likely on the way

Following the recession, project approvals saw a sharp increase in 2013. A spike in permitting followed, with the most permits issued in 2015. A second wave of approvals in 2016 will likely produce an increase in permitting and construction in the near future.

Source: BPDA Pipeline Database (current as of October 1st, 2018), BPDA Research Division Analysis. All approvals within a year are counted, including projects that have returned to the Board for a project change. Projects only counted in one year for permitting and completion.
3a. Markets: Housing
As population in Boston grows, demand for housing has increased

Boston’s population has grown by approximately 93,000 since 2000.

According to the BPDA’s Population Projection,¹ the population is expected to increase to 760,000 by 2030, still slightly less than the high of 800,000 in 1950.

¹ For more information, see Housing a Changing City, Boston 2030: 2018 Update, https://docs.google.com/document/d/1WRWTkvld7_hAKiKz-_F8-J_HCq5mCrWxxBUEFOVgwAM/edit
Boston is on track to surpass the original goals set out in the Housing Boston 2030 Plan

- Original goal: build 53,000 units by 2030, based on expected population of 709,000 by 2030.

- Since inception of plan, 27,513 units have been permitted, including:
  - 2,085 low income restricted rental housing units
  - 8,492 middle income units

- In 2018, Boston updated its goal to 69,000 new units by 2030, based on a revised population projection of 760,000 and the city’s progress in constructing new housing.

The supply of housing units has grown 16% since 2005

In 2017, there were 293,538 housing units in the City, of which 91% were occupied.

Of occupied units, 35% were owner-occupied in 2017.

Vacancy data also includes new units that have entered the market for sale but are not yet occupied.

25
Decreasing mortgage interest rates have coincided with rising homeownership rates

30-Year Fixed-Rate Mortgage Rate

Source: Freddie Mac, via the Federal Reserve Bank of St. Louis, BPDA Research Division Analysis.
Source: U.S. Census Bureau, 1970-2010 Decennial Census, 2017 1-year American Community Survey, BPDA Research Division Analysis
Median monthly rent increased by 17% from 2006 to 2017, faster than median household income, which grew 14% in the same time period. Monthly ownership costs grew only 9%. The percentage households that are housing cost burdened (pay 30% or more of household income on housing costs) decreased from 49% in 2006 to 41% in 2017.

Residential sales volume remains below the height of 2004, while sales prices have surpassed their pre-recession peak.

Residential sales gradually declined from 2004 through the recession and didn't hit bottom until 2011. Sales increased through 2015 but have since fallen. Meanwhile, prices of units, particularly two-family and three-family units, have consistently increased since 2009.

(1) Rounded to the nearest multiple of 50.
Source: City of Boston, Department of Neighborhood Development Using Banker & Tradesman Data (January 2018), BPDA Research Division Analysis.
Article 80 residential project approvals peaked in 2016, making up 61% of that year’s total square footage.

Residential square footage approved per year (Millions SF)

Source: BPDA Pipeline Database, current as of October 1st, 2018, BPDA Research Division Analysis. Square footage associated with NPCs counted as net change except for projects that were approved more than three years prior, for which total square footage was counted (3-year rule).
More than 5 million residential square feet were completed in each of 2015, 2016, and 2017

Residential Square Feet Permitted and Completed by Year

- Olmsted Green: 523 units, 851,000 SF
- Georgetown Homes: 967 units, 830,700 SF
- Government Center Garage: 812 units, 764,800 SF
- Portside at Pier I: 543 units, 873,000 SF
- Seaport Square Block B & C: 832 units, 1.5 million SF
- Millennium Tower: 600 units, 800,000 SF
- Ink Block Project: 546 units, 569,000 SF

Residential units approved, permitted, and completed each year

Source: BPDA Pipeline Database, current as of October 1st, 2018, BPDA Research Division Analysis. Approved units associated with NPCs counted as net change except for projects that were approved more than three years prior, for which total units were counted (3-year rule). Units permitted and completed counted as the gross units for the most recent project approved. Units permitted and completed updated January, 2019 to reflect data improvement.
3b.
Markets: Office
Office inventory has grown by 3.8 million square feet in the past 10 years

There are 313 office buildings in Boston and 10 million square feet are available for lease.

Source: CoStar Office Data, BPDA Research Division Analysis.
The Financial District accounts for 42 million square feet of office space

Q4 2017 Office Inventory by Submarket (Millions SF)

- 5 10 15 20 25 30 35 40 45

Financial District: 42.2
Back Bay: 17.9
Seaport/South Boston: 13.7
Longwood/Fenway: 8.4
North Station/Beacon Hill: 6.3
Midtown: 5.3
Roxbury/Dorchester/Mattapan/Hyde Park: 4.8
Charlestown/East Boston: 4.2
South End: 3.7
North End/Waterfront: 3.2
Allston/Brighton: 3.0

Source: Costar Office Data, BPDA Research Division Analysis.
Office vacancy rates have fallen to less than 10% since a peak of 13% in 2011; high demand has increased office asking rents slightly.

Vacancy is currently at 9.9% in Boston, compared to 16.9% nationwide.

Asking rent for office space is $52/sqft in Boston, compared to $36/sqft nationwide.

Source: Costar Office Data, BPDA Research Division Analysis.
Vacancy rates have decreased in all of Boston’s office submarkets except for Longwood and the South End.

Vacancy is highest in the Financial District and the Seaport, which may be due to large amounts of new construction resulting in new available space.

Source: Costar Office Data, BPDA Research Division Analysis.
Office rents are growing in all Boston submarkets

Market Rent by Submarket (2017$/sqft)

- Allston/Brighton: $38
- Back Bay: $53
- Financial District: $46
- Longwood/Fenway: $51
- Midtown: $34
- North End/Waterfront: $42

- Roxbury/Dorchester: $49
- Seaport: $31
- South Boston: $32
- South End: $40
- South Suffolk County: $29

Source: Costar Office Data, BPDA Research Division Analysis.
Hiring in professional occupations has contributed to the demand for office space

Boston has added almost 26,000 jobs in information, finance/insurance, professional and technical services, and management since 2001.

Reebok, New Balance, and Amazon are among the companies that have opened or are soon to open new offices in the city.

Source: Bureau of Economic Analysis (BEA), Massachusetts Executive Office of Labor and Workforce Development (EOLWD), Employment and Wage (ES-202), BPDA Research Analysis.
Office Approvals are on an upward trend

2018 surpassed the record set by 2017 in office square footage approved, with 3.8 million square feet set to be built.

Source: BPDA Pipeline Database, current as of October 1st, 2018, BPDA Research Division Analysis. Square footage associated with NPCs counted as net change except for projects that were approved more than three years prior, for which total square footage was counted (3-year rule).
Office Square Footage Permitted and Completed by Year

Source: BPDA Pipeline Database, current as of October 1st, 2018, BPDA Research Division Analysis. Square Footage counted as gross of most recently approved project.
3c. Markets: Hotels
Boston’s growth as a tourist and business center have contributed to a booming hotel market

- Suffolk County received $8.8 billion in domestic travel expenditures (half of Massachusetts's total) in 2016\(^1\)
- The Greater Boston Convention & Visitors Bureau projects visitors to Greater Boston to increase from 21.2 M in 2017 to 22.7 M in 2019\(^2\)
- As of March 2018, Boston had 85 licensed hotels, totaling 21,000 rooms\(^3\)

---

\(^2\) Greater Boston Convention & Visitors Bureau, Statistics & Reports, [https://www.bostonusa.com/media/statistics-reports/](https://www.bostonusa.com/media/statistics-reports/)

\(^3\) Boston Source: Boston Licensing Board and STR Inc, BPDA Research Analysis.
Hotel room supply and occupancy rates are rising

The hotel occupancy rate has risen to 83% since a low of 71% in 2009.
Optimal occupancy rates range from 75% to 85% for full-service hotels, according to STR.¹

Optimal occupancy is the level where hotels hit peak gross operating profit, after which operational costs lead to diminishing returns.²

Source: ADR and Occupancy reported by Pinnacle Advisory Group. BPDA Research Division count of room supply at the end of each calendar year. Room Supply counts only rooms in hotels of 50 or more rooms.

¹ Optimal occupancy is the level where hotels hit peak gross operating profit, after which operational costs lead to diminishing returns. http://www.hotelnewsnow.com/Articles/88561/Peak-profitability-Finding-balance-of-occupancy-rate

² Room Supply counts only rooms in hotels of 50 or more rooms.
Hotel rates have also been growing

Average daily rate (a measure of average rental income per paid occupied room in a given year) has grown 20% since 2005.

Source: Pinnacle Advisory Group, BPDA Research Division Analysis.
Employment in accommodation and food services has grown

Accommodation and food services added 19,000 jobs in Boston since 2001 (3rd most among industries).

It was the 5th largest employment category in 2016, making up 8% of jobs.

Article 80 Projects have produced construction jobs

The Boston Residents Job Policy (BRJP) mandates that projects over 50,000 square feet and any public development project must comply with the following hiring practices: 1) at least 51% of total work hours of journey people and apprentices must go to Boston residents 2) at least 40% of works hours must go to people of color and 3) at least 12% of work hours must go to women. The data in the chart represent the total number of work hours occurring on projects to which the BJRP applies.

Article 80 Projects created a total of 3.9 million construction job-hours in 2017
Linkage / IDP Revenue has contributed to housing and job training

• Since the inception of the linkage program in 1983 through December 2017, the Neighborhood Housing Trust (NHT) has awarded approximately $176.7 million in grant funds, representing 5% of the combined development cost of all assisted projects.

• NHT funding contributed to the construction, pending construction, or renovation of 14,467 housing units, of which 12,329 were income restricted.

• The Neighborhood Jobs Trust disbursed $2.2 million to job training and education programs in FY2017, helping to equip more than 2,300 low- and moderate-income Boston residents with essential job skills.
