Harbor Islands

Boston's Harbor Islands were explored - and settled - even before the town itself was in 1830. First used as the sites of trading posts, they became the sites of forts guarding the entrance to the Port of Boston, then gradually for various city institutions and facilities.

Boston Light (est. 1716) on Little Brewster Island is the oldest continuously operated lighthouse in America. Fort Warren on George's Island (completed in 1851) was used in every war since the Civil War until it was decommissioned in 1951. Deer Island served as the site of the Suffolk County House of Correction for more than 100 years (1882-1991), and is now the site of the Massachusetts Water Resources sewage treatment facility. The city's chronic disease hospital was located on Long Island, which now serves as the site of a homeless shelter.

But the islands have always had a recreational appeal. Two summer hotels once operated on Spectacle Island - when the quarantine hospital also located there was not being used. In recent years, more and more effort has gone into making the Harbor Islands more accessible - an effort accelerated by creation of the Boston Harbor Islands National Park in 1997.

i. NOTES TO THE READER

1. Two of the important US Census 2000 data files used in the compilation of demographic reports are Summary File 1 (SF1) and Summary File 3 (SF3). SF1 uses the Short Form questionnaire while SF3 uses the Long Form Questionnaire. Moreover, SF1 is a 100% count giving data to the smallest level of census geography, the Block. SF3 is a sample count of 16% of the population giving data to the Block Group level which is a cluster of Blocks. In the aggregation of SF3 data for this report, the Planning Districts straddle Block Groups boundaries. These will have slightly different numbers from those aggregated using the SF1 data. Total population of the planning district, for example, the South End based on SF1 may show slightly different numbers if compiled using SF3. (See Appendix for a brief description of census geography. Short Form and Long Form Questionnaires can be found on the US Census Bureau website, American FactFinder: <http://factfinder.census.gov>)

2. Because of changes in the boundaries of Block Groups between 1990 and 2000, precise comparison of 1990 and 2000 data on Planning Districts/Neighborhoods is not possible.

3. Racial categories of population are limited to six. Hispanic population may be included in any racial group. White alone population includes Hispanic whites. The category of persons belonging to One or More Races is termed Multiracial.

4. Numbers within parentheses at the end of the table title represent table numbers assigned by the US Census. These table numbers are useful in accessing data using American FactFinder for different types of geography such as a Census Tract or a city. A list of P (Population) and H (Housing) Tables, which provide data at the Block Group level, is given in the Appendix. **This report aggregates only Block Group level data as done for all the Planning Districts. However, data available only for Census Tracts can be aggregated to Boston city to generate a more extensive set of characteristics. Complete census tract data can be found on the US Census website.**

5. While variables are retained in their original form, some of their class intervals have been aggregated into fewer intervals to make the tables simpler.

6. Some tables include additional derived data such as medians or per capita incomes.

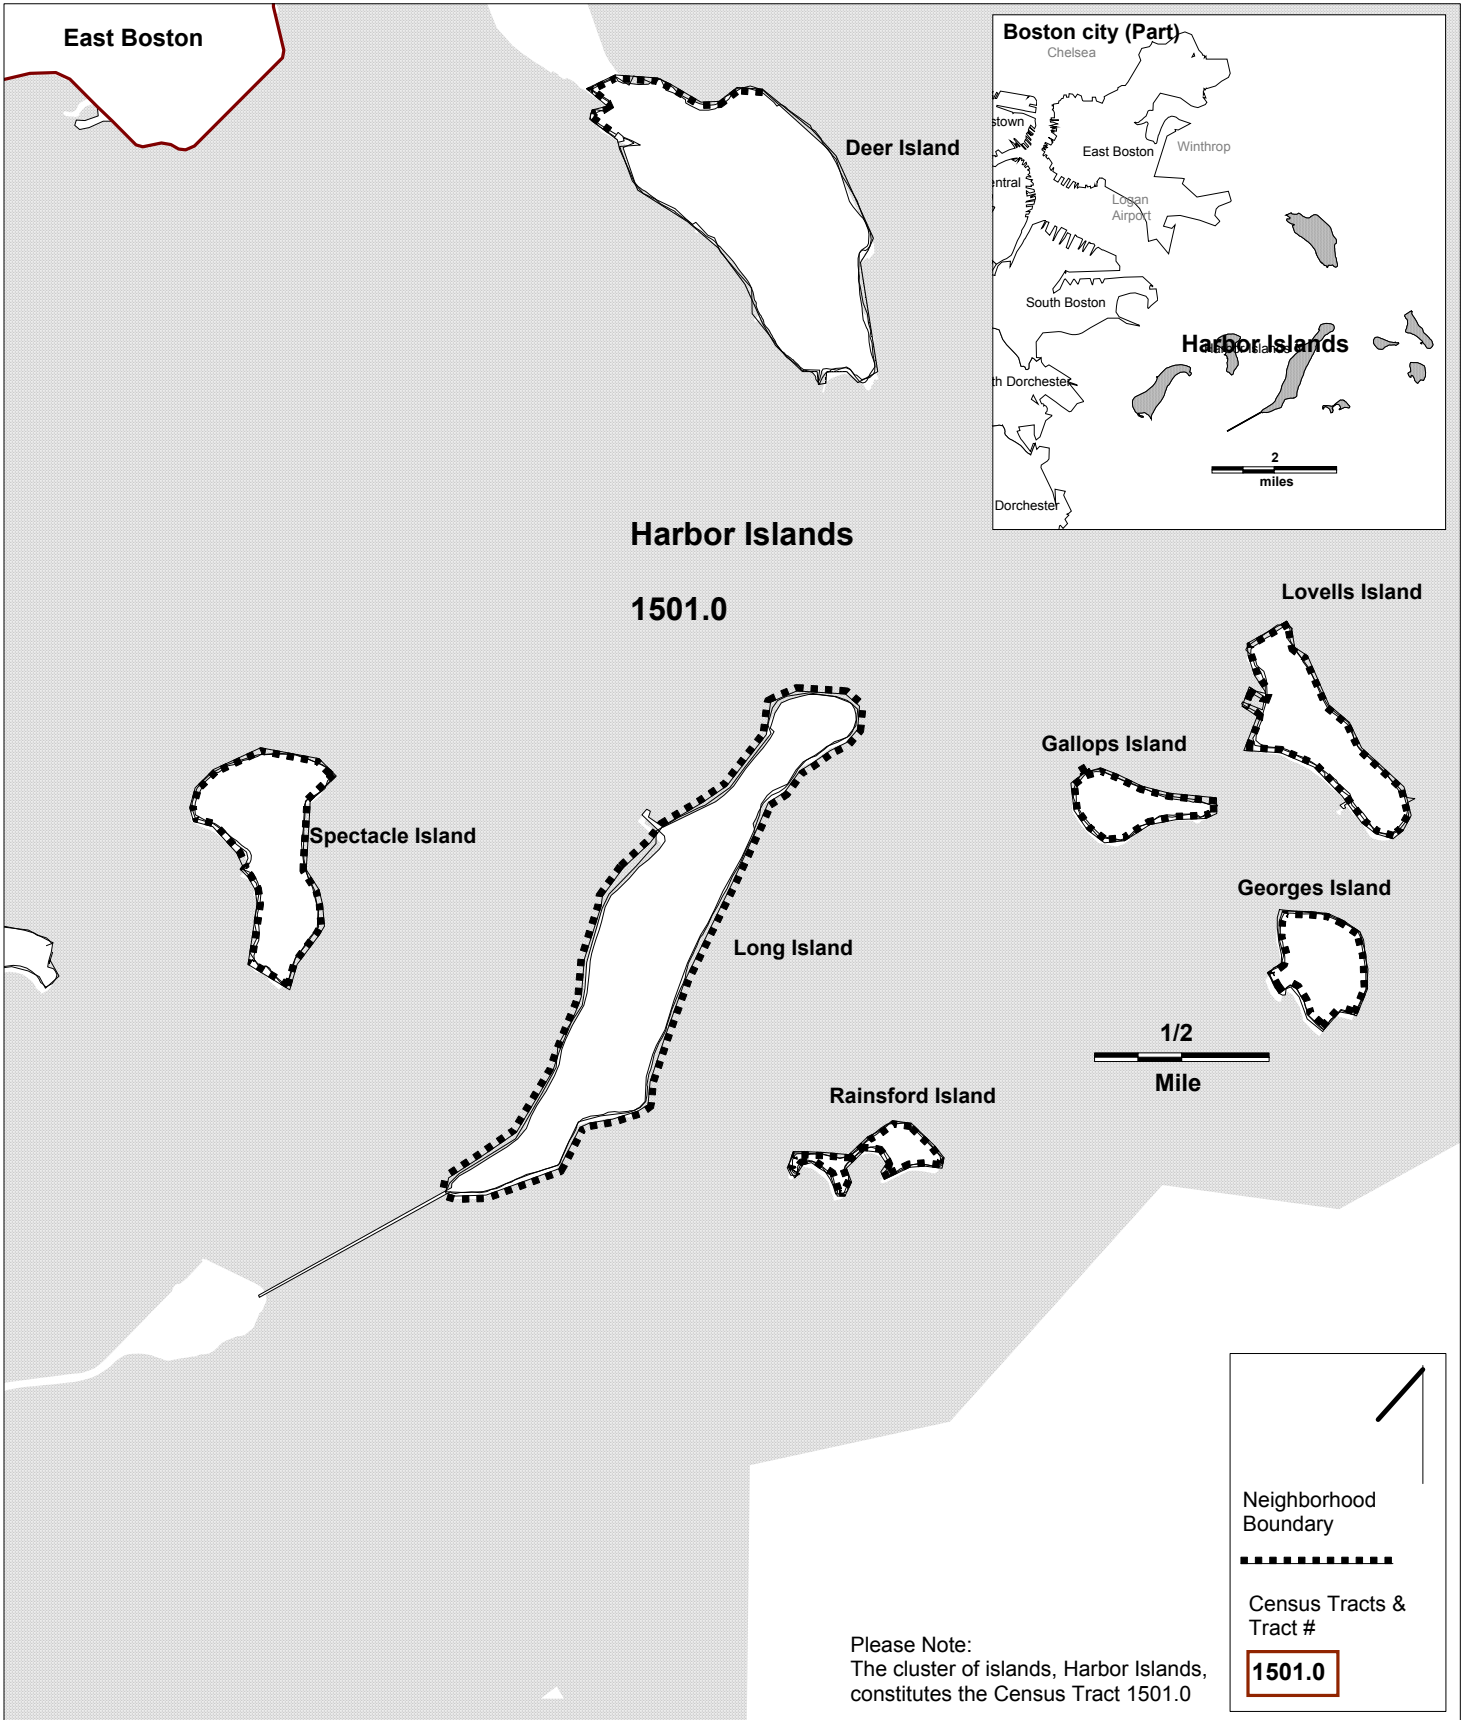

7. For definition of terms, please see "Census 2000 Glossary", which is published as a separate document (Report # 568) by the BRA .

8. Income-related data such as household income, poverty rates, etc. refer to year 1999.
