Major Design Objectives

1. Parking - it is desirable to locate all parking and loading at an internal site location so that large open expanses of parking and pavement are not visible or are otherwise appropriately screened from the public right-of-way.

2. Roofs - roofs shall be organized so that all vents and chimneys and any other projections are architecturally organized and detailed in a mechanical penthouse or
otherwise so that they will provide an attractive appearance when viewed from pedestrian level along the public right-of-way and from windows of high buildings in the vicinity.

3. Landscaping – trees and plant material shall be added to the site in appropriate areas and appropriate amounts. This is particularly important in the areas along Shawmut Avenue and those adjacent to church parcels. Planting and attractive fencing shall be provided to screen parking areas from the view of adjacent housing and church sites.

4. Night Lighting – lighting shall be provided to insure the safety of pedestrians as required and approved by the Boston Redevelopment Authority from time to time. Lighting fixtures shall be shielded to prevent glare to motorists and pedestrians. All fixtures shall be in architectural harmony with the new buildings constructed on the site.

5. It is desirable that appropriate entrances and exits for such persons be constructed on all major frontages.
