

QUINCY CORRIDOR PUBLIC REALM IMPROVEMENT PROJECT

THE PROJECT

The Quincy Corridor Public Realm Improvement Project is a four to six month community process led by the Boston Redevelopment Authority (BRA), in conjunction with the Department of Neighborhood Development (DND), Boston Transportation Department (BTD), the Public Works Department (PWD) and Mayor's Office of Neighborhood Services (ONS). The goal of the effort, working collaboratively with community stakeholders, is to enhance the quality of life along Quincy Street by improving roadways, sidewalks, trees, and lighting. The project area will encompass Quincy Street (located in the Roxbury and Dorchester neighborhoods) from Columbia Road to Blue Hill Avenue. The initiative is part of the Choice Neighborhoods Initiative and coordinated with the ongoing planning efforts of Mayor Menino's Fairmount Indigo Planning Initiative (FIPI).

"The Choice Neighborhoods Grant will go beyond just providing new housing for residents; it will provide greater opportunity for young people and their parents by implementing place-based supports, boosting student achievement and creating avenues for families to reach economic prosperity. I'm committed to ensuring that this grant affords our residents tangible results."

—Boston Mayor Thomas M. Menino
