# WHAT WE HEARD

## Office Building

- Office building looks wide, especially from the western approach
- Boylston Street facade seems very regular and unrelieved

## Hotel/Residential Building

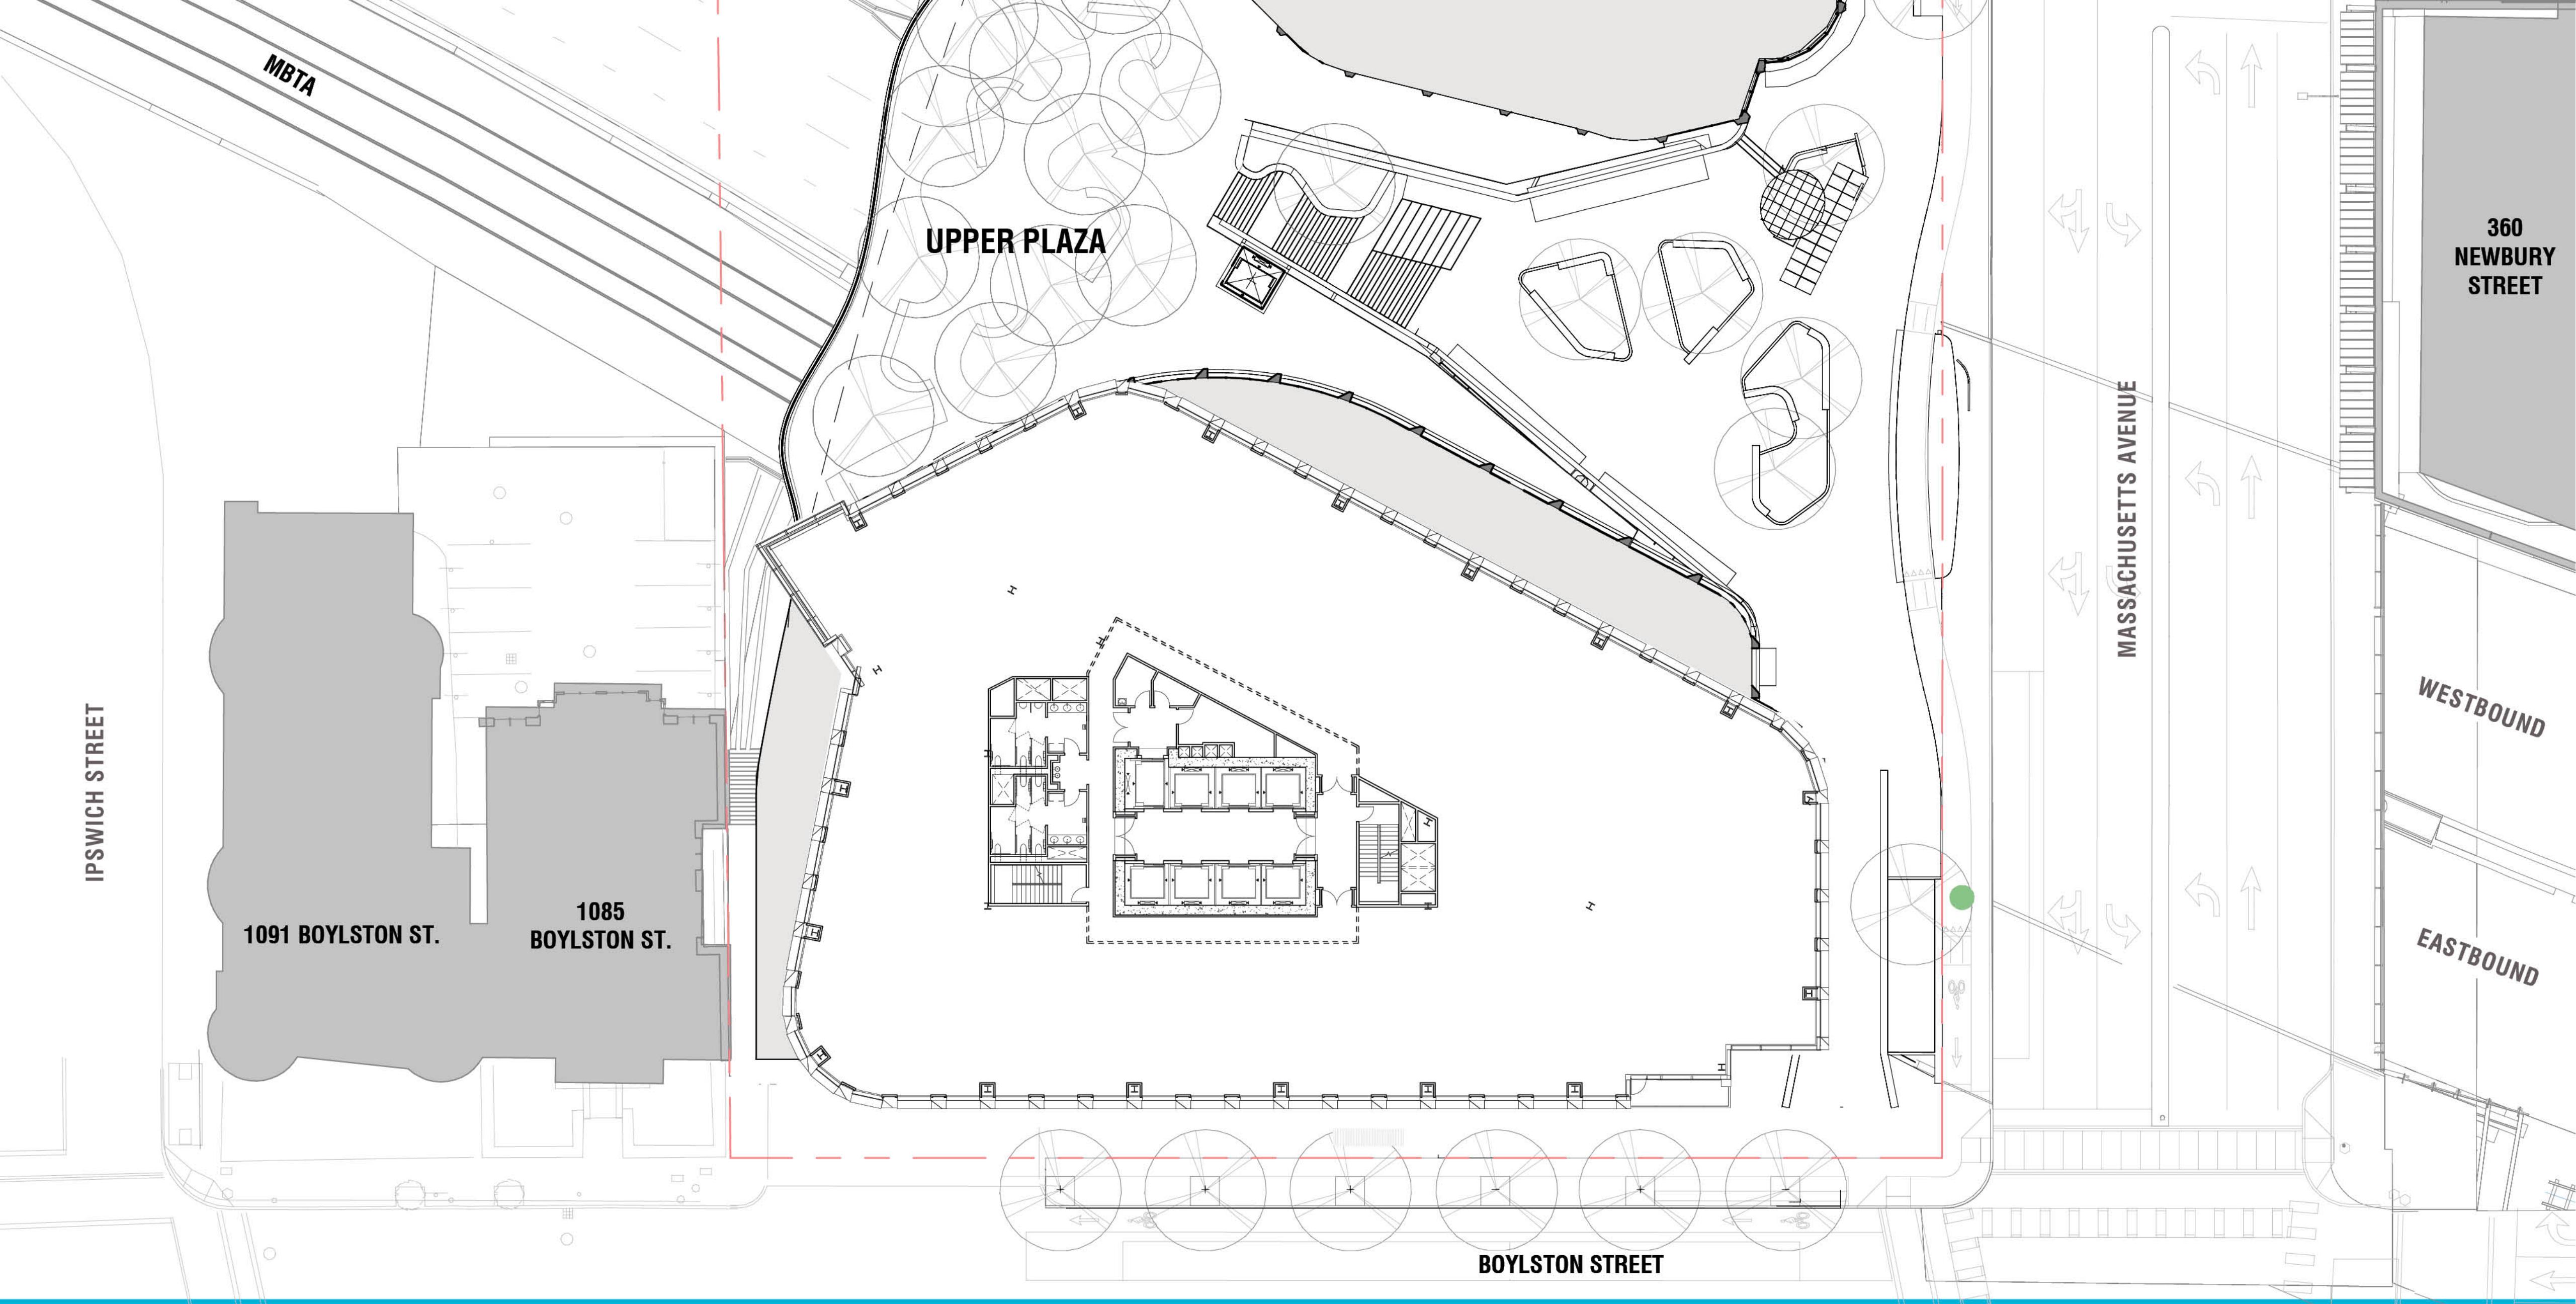

- Hotel/Residential building is very promising and elegant

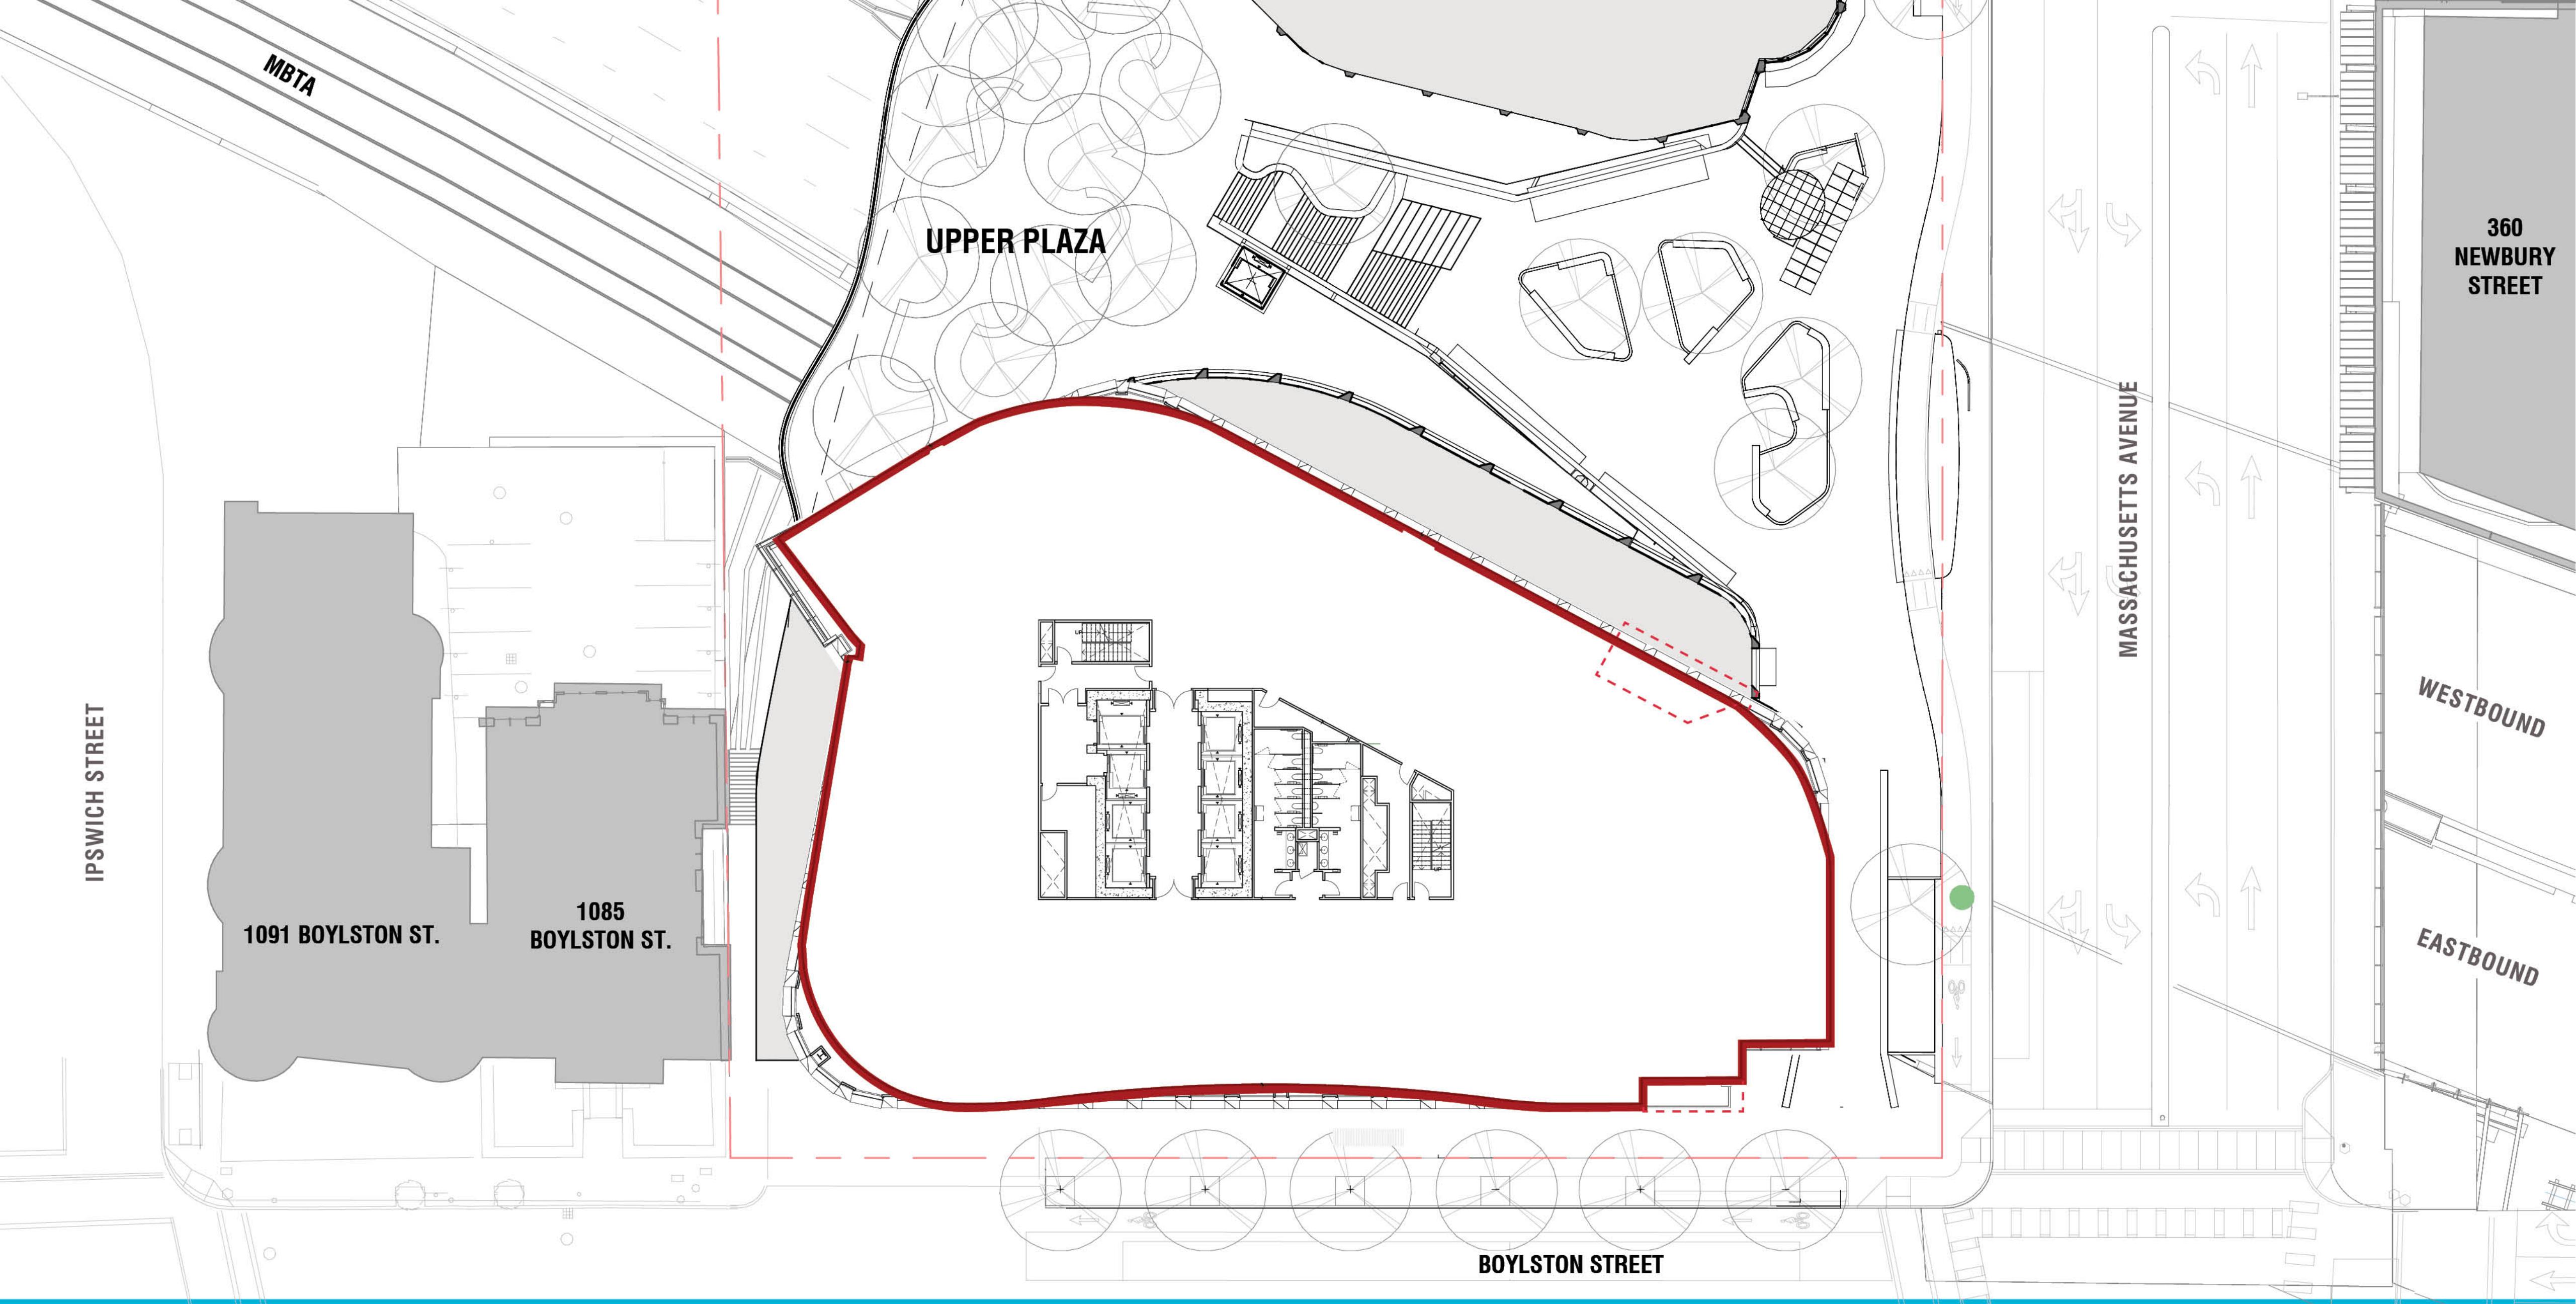

## Western Facade

- Study the view from the eastbound lane, as that is the proper approach view
- The structural supports distract from the building architecture; there are too many architectural moves going on; simplify
- The wave of the upper plaza seems too exposed to the west

## Plaza & Retail

- Weave together the podium architecture with the two towers
- The public plaza is an incredible offering to the public
